## **US FOREST SERVICE TARGETS \$40.6M TO PURCHASE, RESTORE LANDS IN 15 STATES**

The U.S. Forest Service is dedicating \$40.6 million for 27 land acquisition projects in 15 states that will help safeguard clean water, provide recreational access, preserve wildlife habitat, enhance scenic vistas and protect historic and wilderness areas.

Projects funded are in Alaska, California, Colorado, Georgia, Idaho, Indiana, Michigan, Missouri, Montana, New Mexico, North Carolina, Oregon, Tennessee, Utah and Washington. Projects range from protecting nationally significant lands from threat of residential development in North Carolina to help pave the way to help purchase the largest single parcel of privately held land with the [Kootznoowoo Wilderness](#) on the [Tongass National Forest](#) in Alaska.

"In keeping with the Obama Administration's America's Great Outdoors conservation initiative, USDA is committed to conserving and restoring our forests and bringing jobs to rural America," said Agriculture Secretary Tom Vilsack. "Through our partnerships with states, communities, tribes and others, it is vital that we step up our efforts to safeguard our country's natural resources."

Lands are purchased from willing sellers at fair-market value or through partial or outright donations of property. Landowners may also sell or donate easements on their property that restrict commercial development while keeping the land in private ownership.

The following new projects are approved for funding in 2012. To see applications for funding on each project, visit the [Land and Water Conservation Fund](#).

## **FARMERS MARKET PROMOTION PROGRAM GRANTS AVAILABLE**

The USDA is seeking grant applicants for the 2012 Farmers Market Promotion Program. Approximately \$10 million is available for marketing operations such as farmers markets, community supported agriculture and road-side stands. The grants, which are administered by USDA's Agricultural Marketing Service (AMS), are available through a competitive application process on [www.grants.gov](http://www.grants.gov). The grants aim to increase the availability of local agricultural products in communities throughout the country. They will also help strengthen farmer-to-consumer marketing efforts.

"These grants will put resources into rural and urban economies, and help strengthen efforts to provide access to nutritious and affordable foods," said Agriculture Deputy Secretary Kathleen Merrigan. "This program not only supports the health and well-being of local communities but also the economic health of their farms and businesses."

Projects that expand healthy food choices in food deserts or low-income areas (where the percentage of the population living in poverty is 20 percent or above) will receive additional consideration. USDA, in coordination with the Departments of the Treasury and Health and Human Services, seeks to increase access to fresh, healthy and affordable food choices for all Americans, while expanding market opportunities for farmers and ranchers.

Information on applying for a Farmers Market Promotion Program grant will be published in the April 6, 2012, *Federal Register* and available online at [www.ams.usda.gov/FMPP](http://www.ams.usda.gov/FMPP). Applications will **only** be accepted via grants.gov and must be received by May 21, 2012. Applications that are incomplete, hand-

delivered, or sent via U.S. mail will not be considered. Applicants should start the grants.gov registration process as soon as possible to meet the deadline. Contact Carmen Humphrey, Program Manager, by phone: (202) 720-8317, or e-mail: [usdafmppquestions@ams.usda.gov](mailto:usdafmppquestions@ams.usda.gov) for more information.

The Farmers Market Promotion Program is part of USDA's commitment to support local and regional communities. These investments are highlighted in USDA's Know Your Farmer, Know Your Food (KYF) Compass. [KYF Compass](#) is a digital guide to USDA resources related to local and regional food systems. The Compass consists of an [interactive U.S. map](#) showing local and regional food projects and an [accompanying narrative](#) documenting the results of this work through case studies, photos and video content.

A large selection of USDA-supported programs and projects is also visible on the [KYF Map](#), which can be displayed by theme, program, or recipient type. Both the [KYF Compass](#) and map will be regularly refreshed with new data and case studies.

## **FOOD AID SNAP BENEFITS HELP REDUCE POVERTY**

A report on federal food assistance shows how SNAP benefits help to lift some from poverty. Food and Nutrition Services Under Secretary Kevin Concannon talks about where people can get information on USDA's report Alleviating Poverty in the United States: The Critical Role of SNAP Benefits. Concannon tells how the latest report on SNAP food aid benefits those who are poor.

## **AGRICULTURE SECRETARY VILSACK ANNOUNCES BIO-PREFERRED FINAL RULE**

The announcement is for the addition of 13 bio-based product categories which are eligible for Federal procurement preference. Now more than 1,500 additional bio-based products will be offered for preferred purchasing consideration by all Federal government agencies and contractors. The final rule was published in the April 4 Federal Register.

"There are now more than 10,000 products qualifying for preferred procurement under USDA's BioPreferred program" said Agriculture Secretary Tom Vilsack. "Including previously designated items, these 13 additional biobased product categories will help feed the President's initiative by offering even more products with federal procurement preference.

Biobased products are composed wholly or significantly of biological ingredients in new or emerging markets— renewable plant, animal, marine or forestry materials. A Bio-Preferred designated item is one that meets or exceeds USDA-established minimum bio-based content requirements.

Bio-Preferred is comprised of a preferred procurement program for Federal agencies and a voluntary labeling program for the broad scale marketing of bio-based products. Please contact [biopreferred@usda.gov](mailto:biopreferred@usda.gov) for more information about the Round 8 final rule or the Bio-Preferred program.

A complete list and detailed description of each Bio-Preferred designated item, and items for future designation, can be found at [www.biopreferred.gov](http://www.biopreferred.gov); or follow Bio-Preferred at <http://twitter.com/BioPreferred>.

### **HOOSIER AG TODAY PARTNERS WITH PIONEER HYBRIDS ON AGRONOMY PLATFORM –**

Indiana's farm network partnership with the DuPont affiliated company provides farmers with the most up-to-date, field and crop condition reports. The information is distributed using radio, on-line, and smartphone technology. They feature timely updates from Pioneer agronomists located round the state of Indiana. A network of farmers also provides regular in-field updates during the growing season. Combined with weekly crop update reports from USDA and advisories from Purdue University, the platform is among the most up-to-date and comprehensive source for field crop data in the state.

**Gary Truitt** (Hoosier Ag Today – Indianapolis, Indiana <http://www.hoosieragtoday.com>) tells us the audio interviews with Pioneer agronomists who are in the field on a daily basis are being aired on HAT radio programs broadcast by a group of leading stations covering all the major agricultural areas of Indiana. The reports are downloadable on-line on a special agronomy section at [www.hoosieragtoday.com](http://www.hoosieragtoday.com). Hyperlinks to this special section are also included in the daily e-newsletter published by HAT and

distributed to thousands of top Hoosier growers. **Truitt** says, "With the growing use of smartphones by farmers, the agronomy updates are also available in a special section of the "HAT app " available for Android and iPhone\* users. This allows farmers to check field and crop conditions around the state while standing in their own fields."

There's also a selected group of growers that will act as field reporters for the program. "These experienced and well-respected farmers will provide HAT with timely, firsthand information about crop conditions and progress, weather and soil conditions, and disease issues in their area." The growers are strategically located in Jasper, Tipton, Kosciusko, Decatur, Bartholomew, Jay, Montgomery, and Gibson counties throughout Indiana.

In addition to crop and field conditions, the Indiana-based company Farm Clinic that provides fertility and crop management recommendations will contribute regular data and recommendations. Weekly state and national reports from USDA's National Ag Statistics Service will be posted on the web page along with the latest agronomy research from Purdue University.

**IF YOU GIVE TO FFA, YOUR CONTRIBUTION WILL BE MATCHED** – There's a group spanning the country comprising a special advisory council for the [National FFA Foundation](#) that are issuing a challenge to FFA and agricultural education supporters everywhere: Give to FFA and we'll match your gift.

The National FFA Foundation's 2012 Individual Giving Council comprised of **Elin Miller** of Oregon, **Paul Mulhollem** of Kentucky, **Mark Timm** of Indiana, **Jack Pitzer** and **Corey Rosenbush**, both of Virginia, **Rick Malir** of Ohio, **Lynette Marshall** and **Glenn Stith**, both of Iowa, and founding member **Charlie Fischer**. The group has collectively contributed more than \$312,000 which will help the FFA over the next three years to create a new matching-gift program called the Leadership Challenge.

Each new gift, regardless of the amount, or any increase in prior giving that allows an FFA contributor's total gift to meet or exceed \$1,000 will be matched dollar for dollar by Leadership Challenge funds up to \$100,000.

The council's goal is to lead the way in individual giving to support [FFA and agricultural education](#), create a new culture of philanthropy dedicated to FFA and its members by emphasizing the importance of individual contributors and motivating them to give."

**Rob Cooper**, executive director of the National FFA Foundation says, "This is the first time in the 85-year history of FFA that we have had a group of individuals come together, create a pool of donations and offer that pool as matching-fund incentives to encourage others as individuals to give to FFA. By giving as an individual donor, those who choose to support FFA are helping smart, talented and determined FFA members become tomorrow's leaders in the agricultural industry. Tomorrow's leaders will develop new strategies and technologies that will ensure a safe, abundant and affordable food supply for us all."
